Attn: Mr. Paul Brewer

Dear Paul:

A: OILY WATER SUMP

Pursuant to our telephone conversation of August 6, 1986, please extend our interim permit (#1188) for our oily water sump for 30 days. Enclosed please find a proposed change to alternative #2. *with use #2?*

Included are a site plan and detailed sketches of the existing sump and proposed new tank utilizing the existing tank as a secondary containment tank. *←*

Soil samples are to be taken per I.A.W. Title 23, Sections 2645 & 2648 to insure that the existing tank has not leaked, as soon as an outside contractor can be scheduled.

B: 6000 GAS UNLEADED GASOLINE TANK

Please find copies of:

1. Certification of *precision test* pressure test - (Tait & Assoc. 4-11-86)
2. Certification of dispenser calibration - (Charles E. Thomas Co. 8-12-86) ✓
3. Three months daily inventory reconciliation log sheets - (AEI) ✓

Fuel pump suction line leakage monitoring is conducted on an ongoing daily basis each time gasoline is dispensed. (Audible pump cavitation or loss of prime).

Please contact me if additional information is required to extend our interim permit for our oily water sump or qualify us for a final permit to operate our 6000 gallon gasoline tank.

Sincerely,

AMERICAN ELECTRONICS, INC.
